

# Making a vase by using a simple template

---

Today I want to show you how to create a cylindrical vase.

In this project I am doing the imprint first and assemble the side and the base later.

## We are going to need

- a rolling pin
- clay & some slip from the same clay
- doily or other fabric to make an imprint
- 1 sheet of copy paper, some newspaper
- a piece of pipe

### **1. I am going to use a piece of pipe and wrap it in newspaper.**

This helps to get the pipe out later on.

### **2. Make your own template from paper, cut it out**

I am going to use an normal piece of copy-paper. The size will define the hight of the vase.

### **3. Roll out a piece of clay**

### **4. Cut out the pieces for your pot**

I am not cutting out a bottom

### **5. Score & slip both the parts & connect them – press hard**

### **6. cut out the base**

### **7. Move parts of the base into the wall of the vase**

to get a good connection.
